## 1 Executive Summary

The executive summary is a brief synopsis of the report and should not be read in lieu of reading the report in its entirety. EXP was retained to conduct the Due Diligence Phase I Environmental Site Assessment (ESA) Update by Mr. Jagjit Sandhu of “Owen Sound Heights”, located at the development parcel at 2198 and 2050 3rd Avenue East (formerly 2022 3rd Avenue East) in Owen Sound, Ontario, the “site”.

It is understood that this ESA is required for due diligence purposes in support of financing. It is further understood that an updated Record of Site Condition (RSC) is not intended for the site at this time, nor should be required by Ontario Regulation (O. Reg.) 153/04. An RSC was obtained for the site in 2008 (RSC# 45250) for a land use change from industrial to residential. However, given that the site is intended to be converted into a mixture of condominiums, a commercial retail plaza, a hotel, and senior residences, an updated RSC should not be required.

The objective of the Due Diligence Phase I ESA Update was to determine if there were any new indications of environmental impairment to the site since the previous investigations conducted in 2008 and 2019 (Barenco Inc., 2008a; Barenco Inc., 2008b, EXP, 2019). The Due Diligence Phase I ESA Update involved a review of records pertaining to the site, an inspection of the property, interviews with personnel familiar with the site, and a walk-by inspection of the surrounding properties.

The site is located on the west side of 3rd Avenue East, approximately 0.26 kilometres south of 24th Street East, at 2198 and 2050 3rd Avenue East in Owen Sound, as shown on Figure 1. The site measures approximately 5.0 hectares (12.4 acres) in area.

The site was first developed for industrial use in the late 1800s. Occupants included a cement manufacturing company, in operation from 1894 until 1912, and a ship building company (Russel Brothers Limited), in operation from 1925 until the early 1990s, and a mobile crane manufacturing company, in operation during the early 1990s. The four industrial buildings previously located on the site were reportedly demolished in 1993. At the time of the site reconnaissance, the site was a vacant lot occupied by four building footprints, two additional concrete pads and overgrown vegetation.

Based on the findings of the Due Diligence Phase I ESA Update, no new environmental concerns were identified at the site or the surrounding properties since the 2008 and 2019 investigations (Barenco Inc., 2008a; Barenco Inc., 2008b; EXP, 2019). As such, no further environmental work is warranted at this time.

The site was previously assessed and remediated to the Ministry of Environment (MOE) 2004 Site Condition Standards (SCS), which were applicable at the time of the 2008 Phase II ESA and remediation program. Given that this, along with the RSC for the site, were filed in 2008, it should be noted that if environmental assessment followed by an updated RSC in accordance with Ontario Regulation 153/04, as amended, is required in the future, soil and groundwater at the site would require assessment and comparison to the current Ministry of Environment, Conservation and Parks (MECP) 2011 Standards, and further environmental investigation may be required. However, given that the site is intended to be converted into a mixture of condominiums, a commercial retail plaza, a hotel, and senior residences, an updated RSC should not be required.

## 2. Introduction

EXP Services Inc. (EXP) was retained by Owen Sounds Heights (“Client”) to complete a Due Diligence Phase I Environmental Site Assessment (ESA) Update at a portion of the property with the municipal address of 2198 and 2050 3<sup>rd</sup> Avenue East (formerly 2022 3<sup>rd</sup> Avenue East) in Owen Sound. For the purpose of this report, the terms “site” and “subject property” refer to the property referred to as the “development parcel”, located at the municipal address of 2198 and 2050 3<sup>rd</sup> Avenue East, Owen Sound, Ontario. A locality plan is provided as Figure 1. The site boundaries are shown in Figure 2.

The purpose of this Phase I ESA Update was to assess the presence of any new actual or potential environmental risks associated with the subject property since previous investigations (Barenco Inc., 2008a; Barenco Inc., 2008b; EXP, 2019). The objective of this approach is to determine if there were any new indications of environmental impairment to the site that may present potential liabilities. It is understood that this ESA Update is required for due diligence purposes in support of financing. It is further understood that a Record of Site Condition (RSC) is not intended for the site, nor should be required by Ontario Regulation (O. Reg.) 153/04. Further, an RSC was obtained for the site in 2008 (RSC# 45250) for a land use change from industrial to residential. Thus, unless the site is intended to be redeveloped for a more sensitive land use than residential use/parkland/institutional use, an updated RSC should not be required.

EXP performed the Due Diligence Phase I ESA Update following the principles of the Canadian Standards Association (CSA) Z768-01 (R2016) Guideline and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. EXP’s limitations are outlined in Appendix A. Tables and Figures referenced throughout the report are provided at the beginning of the Appendices.

### 2.1 Phase One Property Information

The site is located on the west side of 3<sup>rd</sup> Avenue East, approximately 0.26 kilometres south of 24<sup>th</sup> Street East, at 2198 and 2050 3<sup>rd</sup> Avenue East in Owen Sound, as shown on Figure 1. The site measures a combined area of approximately 5.0 hectares (12.4 acres) in area.

The site was first developed for industrial use in the late 1800s. Occupants included a cement manufacturing company, in operation from 1894 until 1912, and a ship building company (Russel Brothers Limited), in operation from 1925 until the early 1990s, and a mobile crane manufacturing company, in operation during the early 1990s. The four industrial buildings previously located on the site were reportedly demolished in 1993. At the time of the site reconnaissance, the site was a vacant lot occupied by four concrete building footprints, two additional concrete pads and overgrown vegetation.

At the time of the investigation, the site was owned by Owen Sounds Heights.

EXP was retained to conduct the Due Diligence Phase I ESA Update by Mr. Jagjit Sandhu, the owner of Owen Sound Heights, located at 2198 and 2050 3<sup>rd</sup> Avenue East in Owen Sound, Ontario.

The approximate Universal Transverse Mercator (UTM) coordinates for the site centroid are NAD83 17-4937049N 505503E. The UTM coordinates were based on Global Positioning System (GPS) measurements obtained from Google Earth.

### 3. Scope of Investigation

The environmental assessment included a review of historical records pertaining to the site and surrounding properties, a walk-through inspection of the site, a walk-by survey of the surrounding properties, and an evaluation of all information collected. Historical sources of information reviewed included archival aerial photographs and selected Ministry of the Environment, Conservation and Parks (MECP) databases and inventories. The documentation review included a search of applicable federal and provincial government and private source databases through Environmental Risk Information Services Ltd. (ERIS). Information for the site was requested from the Technical Standards and Safety Authority (TSSA), and the MECP Freedom of Information (FOI) office. An online search of the Government of Ontario Environmental Registry, MECP Brownfields Environmental Site Registry, MECP Hazardous Waste Information Network (HWIN), and MECP Well Records Division database was also conducted.

Although EXP made requests for the information available from the operators of these databases, there are inherent limitations and uncertainties in the data provided in that the available data could be an incomplete or inaccurate reflection of historical conditions, and the searches may not have turned up all available relevant data. Due to the historical and documentary nature of the sources consulted, no verification of the accuracy or completeness of the data was made by EXP and statements made by others were not verified for accuracy.

In completing the scope of work for the Phase I investigation, EXP did not conduct any intrusive investigations, including sampling, analyses, or monitoring.

EXP personnel who conducted assessment work for this project included Ms. Amanda Catenaro (QP<sub>ESA</sub>), Mr. Jonathan Keates, and Ms. Sarah DiBattista. An outline of their qualifications is provided in Appendix B.

## 4. Record Review

### 4.1 General

#### 4.1.1 Phase I Study Area Determination

The “Phase I Study Area” included the surrounding land extending a distance of 250 metres from the boundary of the subject property. At the time of the site reconnaissance, land usage within 250 metres of the site boundaries included the Owen Sound Wastewater Treatment Plant to the south, wooded lots and residential land use to the east and north and Owen Sound Harbour (Georgian Bay) to the west.

#### 4.1.2 First Developed Use Determination

The site was first developed for industrial use in the late 1800s. Occupants included a cement manufacturing company, in operation from 1894 until 1912, a ship building company (Russel Brothers Limited), in operation from 1925 until the early 1990s, and a mobile crane manufacturing company, in operation during the early 1990s. The four industrial buildings previously located on the site were reportedly demolished in 1993. The first developed use was determined based on the previous reports (Section 4.1.5).

#### 4.1.3 Fire Insurance Plans

A search of the Catalogue of Canadian Fire Insurance Plans 1875 – 1975 (Catalogue) was conducted by Opta Information Intelligence (Opta) to determine if fire insurance plans (FIPs) or other insurance reports existed for the site. Based on a review of the Catalogue, no FIPs were identified for the site or Phase I Study Area. However, the following reports were provided:

- A report entitled “*Siteplan Report – 1975 Russell Brothers, 2202 3 Avenue East, Owen Sound, ON, N4K 2M5*”.

Based on a review of the Siteplan Report, four buildings occupied the site during this time period and were mainly used for metal working. There were three tanks identified on the site plan, including one, 500 gallon (1892 litre) fuel oil storage tank, one 200 gallon (757 litre) fuel oil storage tank, and one 200 gallon (757 litre) kerosene storage tank. A fuel oil dispenser and a spray booth were observed within the site buildings located at the eastern portion of the site, denoted as buildings 2 and 4. Further, two sets of railway tracks were identified; one entering from the northeast corner of the site and the second running parallel to the eastern site boundary.

- A report entitled “*(1991) Inspection Report – 1991 R.T. I. Leyland Inc. & Russell Brothers Ltd. 2202 3 Avenue East, Owen Sound, ON, N4K 2M5*”.

Based on a review of the inspection report, the site was occupied by a mobile crane manufacturing company in 1991. Four buildings were identified on the site. Buildings 1 and 2, constructed in 1920 and from 1937 to 1953, respectively, were being used for the assembly of crane components. Building 3, constructed in 1940, was used as a machine shop and for fabrication of various products. Building 4, constructed in 1975, was used as a heavy metal workshop.

The Opta reports are provided in Appendix C.

#### 4.1.4 Chain of Title

A chain of title search, which would determine the names of the past property owners, is not thought to be particularly useful nor necessary to meet the objective of this Phase I investigation and therefore was not performed.

#### 4.1.5 Environmental Reports

A summary of an environmental report that was reviewed by EXP is provided below:

**Table 4.1.5: Previous Report Summary**

Date	Report Title	Prepared For	Prepared By	Findings
April 10, 2008	Phase I and II Environmental Site Assessment, 2202 3 <sup>rd</sup> Avenue East, Owen Sound, ON	Rafa Corporation	Carolyn Singer, B.Sc. (Hons), P.Ag. and Jim Phimister, P.Eng, P.Geo, for Barenco Inc.	<p>Barenco Inc. (Barenco) was retained to complete a Phase I and II ESA at 2202 3<sup>rd</sup> Avenue East in Owen Sound. The investigation was completed at both the development parcel, the site, and the north adjacent property, referred to as the waterfront property.</p> <p>At the time of the investigation, the site was vacant with concrete pads, foundation footings, paved and gravel driveways from former industrial operations and vegetation covered the remainder of the site.</p> <p>The site has been used for industrial purposes since the late 1800s, including ship building, steel manufacturing, cement manufacturing and furniture manufacturing.</p> <p>Surrounding areas consisted primarily of residential land uses to the north and east, industrial land use to the south.</p> <p>A review of previous environmental reports noted that the ship building plant (Russel Brothers) was operational from 1925 to 1992. Four buildings were previously present at the site and reportedly demolished in 1993.</p> <p>According to Barenco, there were several areas of environmental concern at the site and at the north adjacent property. Further, there were historical impacts identified in soil of total petroleum hydrocarbons (TPH), benzene, toluene, ethylbenzene and xylenes (BTEX), polycyclic aromatic hydrocarbons (PAHs), metals, and polychlorinated biphenyls (PCBs). A Phase II investigation was recommended.</p> <p>The site was separated into two zones. Zone 1, the north adjacent property, was identified as environmentally sensitive, and was addressed in a Risk Assessment and Remediation Report. Zone 2, the site, was addressed in the Phase II ESA, to confirm and update historical findings and fill in data gaps. The Phase II was completed between October 2006 and April 2008 and included soil and groundwater sampling.</p> <p>Soil samples was analyzed for volatile organic compounds (VOCs), petroleum hydrocarbon (PHC) fractions F1 to F4, PAHs, and metals.</p> <p>Given the intended residential use of the site, the analytical results for the soil and groundwater</p>

Date	Report Title	Prepared For	Prepared By	Findings
				<p>sample were compared to the MOE (2004) Table 3 or Table 5 Standards in a non-potable groundwater condition with medium to fine textured soil and residential land use.</p> <p>The following exceedances in soil were identified:</p> <ul style="list-style-type: none"> <li>• Benzo(a)pyrene at SM4 and TP104B;</li> <li>• Benzo(b/j)fluoranthene and dibenzo(a,h)anthracene at SM4;</li> <li>• Lead at HH8 and SM1;</li> <li>• Molybdenum at SM1;</li> <li>• PHC F1 and F2 at TP15-B; and,</li> <li>• Arsenic, lead, benzo(a)pyrene and dibenzo(a,h)anthracene at TP1, TP2, TP3, TP4 and TP6.</li> </ul> <p>Based on the Phase I and II ESA, remediation work was recommended.</p> <p>Following a comparison of the analytical results to the current Table 3 Site Condition Standards (SCS) (2011) for residential/parkland/institutional property and medium/fine-textured soils, the reported concentrations of the above noted exceedances were above the current Table 3 SCS. In addition, the following exceedances were noted when compared to the current Table 3 SCS;</p> <ul style="list-style-type: none"> <li>• Xylenes at TP15-B; and,</li> <li>• Benzo(a)anthracene, benzo(k)fluoranthene, fluoranthene, and indeno(1,2,3-cd)pyrene at SM4.</li> </ul>
April 11, 2008	Soil Remediation Program, 2202 3 <sup>rd</sup> Avenue East, Owen Sound, ON.	Rafa Corporation	Carolyn Singer, B.Sc. (Hons), P.Ag. and Jim Phimister, P.Eng, P.Geo, for Barenco Inc.	<p>Barenco was retained to complete a soil remediation program at the development parcel, located at 2202 3<sup>rd</sup> Avenue East in Owen Sound.</p> <p>The program was conducted for the purpose of remediating soil exceedances identified at the site during the Phase II ESA completed by Barenco in April 2008.</p> <p>Remedial excavation activities took place between September and November 2008, with additional confirmatory soil sampling in April 2008. A total of five excavation sites are noted as totaling approximately 1,980 m<sup>2</sup>. The excavation sites were advanced to a maximum depth of 2.5 metres below ground surface (mbgs).</p> <p>Confirmatory floor samples from the excavations were submitted for analysis of PHCs, VOCs, PAHs, and metals. The soil samples analyzed were below the MOE (2004) Table 3 SCS, with the exception of B-2 from excavation area 2. In addition, the detection</p>

Date	Report Title	Prepared For	Prepared By	Findings
				<p>limits of five VOCs were above the Table 3 SCS. However, additional floor samples were obtained in April 2008 at these locations as the remediation progressed, and were found to be below the Table 3 SCS.</p> <p>During the remedial excavation activities, the excavated material was removed from site and disposed of at a licensed landfill. Approximately 5,100 tonnes of soil was stockpiled for removal, prior to redevelopment.</p> <p>Based on the confirmatory soil samples from the remediated areas, it was noted that no further assessment or remedial work was warranted at the time of the Soil Remediation Program.</p> <p>Following a comparison of the confirmatory soil sample analytical results to the current Table 3 SCS (2011) for a residential/parkland/institutional property use and a medium/fine-textured soil condition, the following exceedances were noted:</p> <ul style="list-style-type: none"> <li>• PHC F2 at SW and B-1.</li> </ul> <p>It should also be noted that several parameters from the previous reports and the Phase II ESA were in exceedance of the current Table 3 SCS but were not subsequently analyzed for during the soil remediation program.</p>
<p><b>November 25, 2019</b></p>	<p>Due Diligence Phase I Environmental Site Assessment: Development Parcel, 2202 3<sup>rd</sup> Avenue, Owen Sound, Ontario</p>	<p>Circoflex Corporation</p>	<p>Samuel Lee, P.Geo., QP<sub>ESA</sub></p>	<p>EXP was retained to conduct the Due Diligence Phase I ESA Update for the development parcel at 2202 3<sup>rd</sup> Avenue East in Owen Sound, Ontario, the “site”.</p> <p>The site was first developed for industrial use in the late 1800s. Occupants included a cement manufacturing company, in operation from 1894 until 1912, and a ship building company (Russel Brothers Limited), in operation from 1925 until the early 1990s, and a mobile crane manufacturing company, in operation during the early 1990s. The four industrial buildings previously located on the site were reportedly demolished in 1993. At the time of the site reconnaissance, the site was a vacant lot occupied by four building footprints, two additional concrete pads and overgrown vegetation.</p> <p>Based on the findings of the Due Diligence Phase I ESA Update, no new environmental concerns were identified at the site or the surrounding properties since the 2008 investigations (Barenco Inc., 2008a; Barenco Inc., 2008b). As such, no further environmental work is warranted at this time.</p>

Based on the previous reports, historic soil exceedances for PHCs, VOCs, PAHs and metals were identified at the site. However, these impacts were addressed during the remediation program conducted by Barenco Inc. in 2008, where soil was remediated to the then applicable, MOE 2004 SCS. An RSC was subsequently filed for the site (RSC# 45250).

EXP compared the original soil exceedances against the current MECP 2011 Table 3 SCS. Several parameters from the previous reports and the Phase II ESA were in exceedance of the current Table 3 SCS but were not subsequently analyzed for during the soil remediation program. Thus, if a new RSC is required for the site, these exceedances would need to be further investigated and assessed.

## 4.2 Environmental Source Information

### 4.2.1 Federal and Provincial Database Search

A search of select provincial, federal, and private databases for records pertaining to the site and properties within 250 metres of the site was conducted by ERIS. EXP has confirmed neither the completeness nor the accuracy of the records that were provided.

A copy of the ERIS report is provided in Appendix D. A summary of noteworthy findings is provided below:

Location & Proximity to Site	Summary	Database	Potential Environmental Concern to Site (Yes/No)
<b>Site</b>			
2198 3 <sup>rd</sup> Avenue East (formerly addressed as 2202 3 <sup>rd</sup> Avenue East)	<p>Russel Brothers was listed as a waste generator of paint/pigment/coating residues, aromatic solvents, petroleum distillates and waste oil and lubricants from 1986 to 2001; and PCBs from 1990 to 2001.</p> <p>982435 Ontario Ltd. was listed as a waste generator of PCBs from 1994 to 1998.</p> <p>The Corporation of the City of Owen Sound was listed as a waste generator of PCBs and oil skimmings and sludges from 1996 to 2001. Additionally, they were listed as a waste generator from 2002 to 2004, however; no waste classes were reported for this time period.</p> <p>Russel Brothers reported a spill of a small amount of capacitor oil in 1988. The exact location of the spill at the site was not disclosed.</p>	<p>GEN</p> <p>SPL</p>	No, any potential soil or groundwater impacted from these historic activities would have been addressed during the Phase II investigation and soil remediation program conducted in 2008 (Section 4.1.5)
<b>Surrounding Properties</b>			
2050 3 <sup>rd</sup> Avenue East (South adjacent)	City of Owen Sound was listed as a waste generator of petroleum	<p>GEN</p> <p>REC</p>	No, due to the cross-gradient location with

Location & Proximity to Site	Summary	Database	Potential Environmental Concern to Site (Yes/No)
	<p>distillates from 1992 to as of November 2021; waste oil &amp; lubricants from 1992 to 2016; PCBs from 2015 to as of November 2021; and inorganic laboratory chemicals from 2018 to as of November 2021.</p> <p>The Ministry of Environment was listed as a waste generator of petroleum distillates and waste oils and lubricants from 1986 to 1990 and 1992 to 1998.</p> <p>Veolia Water Canada Incorporated was listed as a waste generator of petroleum distillates and waste oils and lubricants from 2005 to 2011.</p> <p>Ontario Clean Water Agency was listed as a waste generator of petroleum distillates and waste oils and lubricants from 1994 to 2001. The Agency was also listed as a waste generator of undefined waste classes in 2003 and 2004.</p> <p>Ontario Clean Water Agency, Owen Sound Waste Water Treatment Plant, was listed as a water pollution control plant (WPCP) and a waste receiver from 1998 to 2008.</p> <p>Various spills were reported for the property, including spills of raw unchlorinated sewage and sludge to the ground and catch basins.</p>	SPL	respect to the anticipated westerly groundwater flow direction (Section 4.3.3).
2313 3 <sup>rd</sup> Avenue East (40 m northeast)	Hydro One Networks Inc. was listed as a waste generator of oil skimmings and sludges and other specified inorganics from 2015 to 2016.	GEN	No, due to the cross-gradient location with respect to the anticipated westerly groundwater flow direction (Section 4.3.3).
2125 5 <sup>th</sup> Avenue East (135 m east)	A spill of motor oil to soil was recorded in 2014. The quantity and specifications of the spill were not disclosed by the listing.	SPL	No, given that the quantity of the spill was not disclosed, it cannot be assessed as a potential environmental concern.
2047 3 <sup>rd</sup> Avenue East (100 m south)	A spill of natural gas resulting from operator error was recorded in 2018.	SPL	No, due to the cross-gradient location with

Location & Proximity to Site	Summary	Database	Potential Environmental Concern to Site (Yes/No)
	The quantity and specifications of the spill were not disclosed by the listing.		respect to the anticipated westerly groundwater flow direction (Section 4.3.3).

## Databases:

GEN – Ontario Regulation 347 Waste Generators Summary

SPL – Ontario Spills

REC – Ontario Regulation 347 Waste Receivers Summary

#### 4.2.2 Municipal Records

LGI Copy Service Canada was retained to conduct a search of city directories for the Phase I Study Area. A search of Vernon's Owen Sound, Ontario City Directories was conducted for the years 1940, 1958, 1964, 1970, 1974, 1981, 1985, 1989, 1995/96, 1999/00 and 2005/06. The search results were reviewed by EXP in order to identify the historical occupancy of the site and neighbouring properties to determine potential environmental concerns, if any.

The municipal address formerly known as the site, 2202 3<sup>rd</sup> Avenue East, was occupied by Russel-Hipwell Engines Ltd in 1958, Russel Bros Ltd. Boat Builders in 1964 to 1974, Russel Brother Ltd. in 1981, and Russel Brothers Division of Paccar Canada Ltd. from 1985 to 1989. The site was listed as vacant from 1995/96 to 2005/06.

The property, 2198 3<sup>rd</sup> Avenue East, was listed as Russel-Hipwell Engines Ltd. Manufacturing in 1964 and was likely an extension of the boat building activities located at the site during this time period.

The majority of the surrounding properties within the Phase I Study Area were listed for residential use from 1940 to 2005/06.

The following listings were identified based on the review of the city directories. However, based on their cross-gradient location from the site, with respect to the inferred westerly groundwater flow direction, they are not considered potential environmental concerns:

- 2050 3<sup>rd</sup> Avenue East, located south adjacent to the site, was occupied by the Owen Sound Water Pollution Control Plant in 1970 and the Ministry of the Environment Sewage Treatment Plant from 1974 to 2005/06; and,
- 2362 3<sup>rd</sup> Avenue East, located north adjacent to the site, was listed as Empire Stove Parts from 1940 to 1958.

Note that both the adjacent parcel to the south of the site, and a parcel located at the site are both municipally addressed as 2050 3<sup>rd</sup> Avenue East.

The full street directory search is provided in Appendix E.

#### 4.2.3 Ontario Ministry of the Environment Records

Records pertaining to the site were requested from the MECP through the Freedom of Information (FOI) and Protection of Privacy Act on January 19, 2022. No records have been received to date. FOI requests can take several months to obtain. When received, EXP will forward any significant findings.

On January 27, 2022, the MECP Hazardous Waste Information Network (HWIN) website was searched for registered waste generators in the vicinity of the site. No records, aside from those identified in the ERIS report, were found.

On January 18, 2022, the MECP Brownfields Registry website was searched for postings of RSCs within 250 metres of the site centroid. An RSC was filed for the site in 2008 (RSC# 45250). The RSC was reviewed as part of the Phase I ESA Update and indicated the following pertinent information:

- The RSC was filed for a transition from industrial to residential land use;
- The final RSC property profile indicated that PHC fractions F1-F4, VOCs, metals and PAHs in soil and groundwater were below the then applicable Table 3: non-potable groundwater SCS (MOE, 2004); and,
- As part of the remediation program, approximately 2,550 m<sup>3</sup> of soil was removed from the site.

The MECP Interactive Map “Well Records” was searched for water well records within 250 metres of the site boundaries. Seven records were found for wells located at the site, which were used solely for groundwater monitoring purposes. During the site reconnaissance, seven monitoring wells were observed throughout the site (Section 6). Based on previous reports (Section 4.1.5), the on-site monitoring wells were installed between 2006 and 2013, with depths ranging from 4.0 to 9.1 mbgs.

Ten water wells were found at properties within the Phase I Study Area. All off-site wells were used for monitoring purposes and were installed between 2007 and 2018, with depths ranging from 3.1 to 8.2 mbgs.

Documents pertaining to MECP information are provided in Appendix F.

#### 4.2.4 Technical Standards and Safety Authority

The Technical Standards and Safety Authority (TSSA) was contacted for records of underground storage tanks (USTs) at the subject property and adjacent properties. The TSSA Public Information Coordinator was contacted via email on January 18, 2022. The TSSA did not have any records for USTs on the site or adjacent properties.

It is noted that the Fuels Safety Division did not register private USTs or aboveground storage tanks (ASTs) prior to January of 1990, or furnace oil tanks prior to May 1, 2002. The Fuels Safety Division also does not register waste oil tanks in apartments, office buildings, residences etc., or aboveground gas or diesel tanks.

A copy of the TSSA communications are provided in Appendix F.

### 4.3 Physical Setting Sources

#### 4.3.1 Aerial Photographs

Aerial photographs taken in 1966, 1973, and 1987 were obtained from the Natural Resources of Canada National Air Photo Library in Ottawa. Satellite images taken in 2005 and 2019 were reviewed from the Google Earth website.

**Table 4.3.1: Aerial Photographs Summary**

Year	Description of Structures on the Site	Description of Surrounding Properties
1966	The site is occupied by three large industrial buildings. Owen Sound Harbour is present approximately 30 metres west of the site. A railway track runs north to south, along the eastern boundary of the site.	Residential dwellings are present east of the site. An industrial property is located north adjacent to the site. A woodlot is located approximately 70 metres to the east. The road network appears to be the same as present day.
1973	Same as above.	Same as above.
1987	An additional building has been constructed on the southern portion of the site.	An industrial property has been developed to the south of the site. No other significant changes have occurred to the surrounding properties since the 1973 aerial photograph.

Year	Description of Structures on the Site	Description of Surrounding Properties
2005	<p>The site is vacant and all buildings have been demolished. However, the building foundations are still visible.</p> <p>The railway along the eastern portion of the site appears to have been mothballed and is being used as a walking trail.</p>	<p>The industrial property north adjacent to the site has been demolished and is now being used as vacant land.</p> <p>No other significant changes have occurred to the surrounding properties since the 1987 aerial photograph.</p>
2019	<p>The site appears to be occupied by wooded areas and overgrown vegetation.</p>	<p>A residential dwelling appears to the north of the site.</p> <p>No other significant changes have occurred to the surrounding properties since the 2005 aerial photograph.</p>

Copies of the aerial photographs and satellite images are included in Appendix G.

### 4.3.2 Topography, Hydrology and Geology

The site is located in the physiographic region known as the Elma Till. The native soils within this region are predominantly sandy silt to silt matrix, clayey silt along southern margin, moderately stony, strongly calcareous. (Chapman and Putnam, 1984).

According to the Geological Survey of Canada map of the area, the underlying geology comprises the Clinton Group and Cataract Group. Bedrock at the site consists of shale, sandstone, siltstone, and dolostone (Geological Survey of Canada, 1991).

Based on the elevation measurements provided on Google Earth, the site is evenly graded with an elevation of approximately 179 metres above sea level (masl). The topography in the vicinity of the subject property is relatively flat. Regionally, the land slopes westwards, towards Georgian Bay (Owen Sound Harbour).

Table 1 summarizes the environmental setting and site characteristics. Using  $1 \times 10^{-5}$  cm/s for the hydraulic conductivity of sandy silt, a gradient of 0.01 m/m, and an effective porosity of 30%, Darcy's Law calculations were made to determine the potential groundwater flow velocity at the site, as shown in Table 2.

The groundwater flow velocity was calculated to be approximately  $1.05 \times 10^{-1}$  metres (10.5 centimetres) per year in the native sandy silt. The local and regional groundwater flow direction is inferred to be westerly, towards Georgian Bay (Owen Sound Harbour).

### 4.3.3 Water Bodies and Areas of Natural Significance

There are no water bodies on the site. The nearest surface water body to the site is Georgian Bay (Owen Sound Harbour), located approximately 30 metres to the west.

Based on the Ministry of Natural Resources and Forestry's "Make a Map: Natural Heritage Areas" the site is not located within 30 metres of any of the following:

- An area reserved or set apart as a provincial park or conservation reserve under the Provincial Parks and Conservation Reserves Act, 2006;
- An area of natural and scientific interest (life science or earth science) identified by the Ministry of Natural Resources and Forestry as having provincial significance;
- A wetland identified by the Ministry of Natural Resources and Forestry as having provincial significance;
- An area designated as an escarpment natural area or an escarpment protection area by the Niagara Escarpment Plan under the Niagara Escarpment Planning and Development Act;
- An area identified by the Ministry of Natural Resources and Forestry as significant habitat of a threatened or endangered species;

- An area which is habitat of a species that is classified under section 7 of the Endangered Species Act, 2007 as a threatened or endangered species;
- Property within an area designated as a natural core area or natural linkage area within the area to which the Oak Ridges Moraine Conservation Plan under the Oak Ridges Moraine Conservation Act, 2001 applies; and,
- An area set apart as a wilderness area under the Wilderness Areas Act.

Schedule A of The City of Owen Sound Official Plan Background Study (Biglieri, 2003) indicates that the site is partially located on “hazard lands”, which is considered a resource feature that must be protected to maintain stable valley and river valley banks.

## 5. Interviews

Interviews were conducted by EXP staff with the individuals identified to be the most knowledgeable with respect to both the current and historical site uses. The interviews were conducted during the site reconnaissance in order to obtain information to assist in identifying details of potentially contaminating activities, potential contaminant pathways in, on, or below the site, and areas of potential environmental concern. Any information provided during the interviews is presented alongside information from the site reconnaissance in Section 5.

During the completion of this Phase I ESA, the following individual was interviewed:

1. Mr. Moe Zadeh of Circoflex Corporation was interviewed via phone call on November 25, 2019.

Mr. Zadeh has owned the site for approximately 15 years. During this time, there have not been any spills or MECP notices or orders charged to the site. To the best of Mr. Zadeh's knowledge, there are no underground storage tanks, septic fields, or septic systems on the site.

All of the answers obtained in the interview process were confirmed through visual observations during the site reconnaissance and do not contradict any of the historical information obtained through other sources. These findings are illustrated in the remainder of this report.

## 6. Site Reconnaissance

### 6.1 General Requirements

The Phase I Site reconnaissance was conducted on January 21, 2022, between 10:30 pm and 12:00 pm by Mr. Jonathan Keates under the supervision of Ms. Amanda Catenaro, a Qualified Person as defined by O. Reg. 153/04; their qualifications are provided in Appendix B.

On the day of the site reconnaissance, the weather was overcast with a temperature of -15°C.

At the time of the site reconnaissance, the site was a vacant lot. The entirety of the site was snow-covered. Thus, the underlying vegetation and ground surface could not be inspected during the reconnaissance. However, building foundations of four buildings were observed on the central and northern portions of the site, along with two additional concrete pads.

Photographs documenting the site reconnaissance are included in Appendix H.

### 6.2 Site Description and Buildings

The site is irregular in shape and measures a combined area of approximately 5.0 hectares (12.4 acres) in area. The site is accessed by a paved driveway off the west side of 3<sup>rd</sup> Avenue East. The entirety of the site was snow-covered. Thus, the underlying vegetation and ground surface could not be inspected during the reconnaissance.

No permanent structures were present at the site at the time of the reconnaissance. The former industrial buildings footprints were observed on the central and northern portion of the site, along with two additional concrete pads.

No USTs or ASTs were observed during the site reconnaissance.

No unidentified substances were identified during the site reconnaissance.

Seven groundwater monitoring wells were observed throughout the site. However, it is suspected that more are present based on previous reports (Barenco 2008a; Barenco 2008b) but that identification of all wells was precluded by the snow cover.

### 6.3 Adjacent and Surrounding Properties

At the time of the site reconnaissance, land usage within 250 metres of the site boundaries included the residential use to the north and east, Owen Sound Water Treatment Plant to the south and Owen Sound Harbour to the west.

### 6.4 Designated Substances and Other Issues

#### 6.4.1 Heating and Cooling Systems

The Occupational Health and Safety Act identifies 11 designated substances. These substances are regulated for labour exposure issues during construction and demolition activities. These 11 substances are asbestos, acrylonitrile, arsenic, benzene, coke oven emissions, ethylene oxides, isocyanates, lead, mercury, silica, and vinyl chloride.

No buildings with heating and cooling systems were present on-Site.

#### 6.4.2 Special Attention Items

The CSA Z768-01 Guidelines outlines general requirements for the Phase I ESA process. CSA Z768-01 requires that the potential presence of several substances be identified during a Phase I investigation due to heightened public concern or specific environmental legislation. These special attention items include PCBs, asbestos-containing materials (ACMs), lead, ozone-depleting materials (ODMs), urea foam formaldehyde insulation (UFFI), radon, mould, noise and vibrations, and electric and magnetic fields.

Since there are no occupied buildings on-Site, no PCBs, ACMs, lead, ODMs, UFFI or mould were observed to be present at the subject property.

There are no occupied buildings at the Site, therefore radon exposure is not anticipated to be an issue at the Site.

There was no evidence of operations on-Site or off-Site which produced noise or vibration levels in excess of the *Ontario Health and Safety Act* criteria or the *Environmental Protection Act*. Noise and vibration level tests were neither performed nor deemed warranted as a part of this investigation.

## 7. Conclusions

The Site was first developed for industrial use circa 1800's. The industrial buildings located on the Site were reportedly demolished in 1993. At the time of the Site reconnaissance, the Site was used a vacant lot. The Site was occupied by four (4) building footprints, two additional concrete pads and overgrown vegetation.

Based on the findings of the Due Diligence Phase I ESA Update, no new environmental concerns were identified at the site or the surrounding properties since the 2008 and 2019 investigations (Barenco Inc., 2008a; Barenco Inc., 2008b; EXP, 2019). As such, no further environmental work is warranted at this time.

The site was previously assessed and remediated to the MOE 2004 SCS, which were applicable at the time of the 2008 Phase II ESA and remediation program. Given that this, along with the RSC for the site, were filed in 2008, it should be noted that if environmental assessment followed by an updated RSC in accordance with Ontario Regulation 153/04, as amended, is required in the future, soil and groundwater at the site would require assessment and comparison to the current MECP 2011 Standards, and further environmental investigation may be required. However, given that the site is intended to be converted into a mixture of condominiums, a commercial retail plaza, a hotel, and senior residences, an updated RSC should not be required.

## 8. Closure

We trust this report is satisfactory for your purposes. Should you have any questions, please do not hesitate to contact this office.

Yours truly,

EXP Services Inc.

Sarah DiBattista, M.E.Sc.  
Environmental Scientist  
Environmental Services

Amanda Catenaro, M.E.Sc., P.Ge., QP<sub>ESA</sub>

## Appendix A – Limitations and Use of Report

## LIMITATIONS AND USE OF REPORT

### BASIS OF REPORT

The Report is based on site conditions known or inferred by the investigation undertaken as of the date of the Report. Should changes occur which potentially impact the condition of the site the recommendations of EXP may require re-evaluation. Where special concerns exist, or the Client has special considerations or requirements, these should be disclosed to EXP to allow for additional or special investigations to be undertaken not otherwise within the scope of investigation conducted for the purpose of the Report.

Where applicable, recommended field services are the minimum necessary to ascertain that construction is being carried out in general conformity with building code guidelines, generally accepted practices and EXP's recommendations. Any reduction in the level of services recommended will result in EXP providing qualified opinions regarding the adequacy of the work. EXP can assist design professionals or contractors retained by the Client to review applicable plans, drawings, and specifications as they relate to the Report or to conduct field reviews during construction.

### RELIANCE ON INFORMATION PROVIDED

The evaluation and conclusions contained in the Report are based on conditions in evidence at the time of site inspections and information provided to EXP by the Client and others. The Report has been prepared for the specific site, development, building, design or building assessment objectives and purpose as communicated by the Client. EXP has relied in good faith upon such representations, information and instructions and accepts no responsibility for any deficiency, misstatement or inaccuracy contained in the Report as a result of any misstatements, omissions, misrepresentation or fraudulent acts of persons providing information. Unless specifically stated otherwise, the applicability and reliability of the findings, recommendations, suggestions or opinions expressed in the Report are only valid to the extent that there has been no material alteration to or variation from any of the information provided to EXP.

### STANDARD OF CARE

This report ("Report") has been prepared in a manner consistent with the degree of care and skill exercised by engineering consultants currently practicing under similar circumstances and locale. No other warranty, EXPRESSED or implied, is made. Unless specifically stated otherwise, the Report does not contain environmental consulting advice.

### COMPLETE REPORT

All documents, records, data and files, whether electronic or otherwise, generated as part of this assignment form part of the Report. This material includes, but is not limited to, the terms of reference given to EXP by the Client, communications between EXP and the Client, other reports, proposals or documents prepared by EXP for the Client in connection with the site described in the Report. In order to properly understand the suggestions, recommendations and opinions expressed in the Report, reference must be made to the Report in its entirety. EXP is not responsible for use by any party of portions of the Report.

## USE OF REPORT

The information and opinions expressed in the Report, or any document forming part of the Report, are for the sole benefit of the Client. No other party may use or rely upon the Report in whole or in part without the written consent of EXP. Any use of the Report, or any portion of the Report, by a third party are the sole responsibility of such third party. EXP is not responsible for damages suffered by any third party resulting from unauthorised use of the Report.

## REPORT FORMAT

Where EXP has submitted both electronic file and a hard copy of the Report, or any document forming part of the Report, only the signed and sealed hard copy shall be the original documents for record and working purposes. In the event of a dispute or discrepancy, the hard copy shall govern. Electronic files transmitted by EXP utilize specific software and hardware systems. EXP makes no representation about the compatibility of these files with the Client's current or future software and hardware systems. Regardless of format, the documents described herein are EXP's instruments of professional service and shall not be altered without the written consent of EXP.

## Appendix B – Qualifications of Assessors

**Amanda Catenaro, M.E.Sc., P.Geo., QP<sub>ESA</sub> (Senior Project Manager)**

Amanda Catenaro graduated from McMaster University in 2012 with a Bachelor of Science degree in Environmental Science, specialized in Hydrogeology and Climatology. She completed her Master of Environmental Science Degree from the University of Toronto in 2013. Ms. Catenaro has worked on a number of Phase One and Two environmental site assessments, delineation programs, ex-situ and in-situ remediation projects, and peer reviews since joining EXP Services Inc. in 2013. Ms. Catenaro is a Professional Geologist (P.Geo.) in Ontario and is a Qualified Person (QP) for environmental site assessments under Ontario Regulation 153/04.

Ms. Catenaro has international experience working on environmental projects in the United Kingdom and United States of America, including undertaking desk studies, risk assessments, and remediation projects (strategy development, design, implementation and validation). She has closed-out projects in a variety of specialized sectors, including large scale transportation, highway, rail, and water infrastructure programs.

**Jon Keates, B.Sc, AdvDip (Environmental Technician)**

Jon Keates graduated from the University of Waterloo in 2019 with a Bachelor of Science in Environmental Science and obtained an Advanced Diploma in Environmental Technology from Durham College in 2020. Since starting at EXP January 18, 2021, he has been involved in groundwater monitoring, borehole logging, test pitting, well installations, and Phase One and Two Environmental Site Assessments.

**Sarah DiBattista, M.E.Sc. (Environmental Scientist)**

Sarah DiBattista graduated from the University of Toronto with an Honours Bachelor of Science, double majoring in Nutrition and Environment and Health and minoring in Environmental Studies. Following her graduation in 2019, Ms. DiBattista earned her Master of Environmental Science from the University of Toronto in 2021. Since joining EXP in January 2021, her fieldwork experiences have included overseeing the drilling of boreholes and installation of monitoring wells, the development and monitoring of said wells, conducting Phase One and Two Environmental Site Assessments, and aiding in project reporting efforts.

## Opta Historical Environmental Services Enviroscan<sup>TM</sup> Terms and Conditions

### Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

### Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

### Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

### Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

### Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

INSPECTION REPORT

File No. SR 1829

Region No. 5

IBC CODE: Terr. 80 Ind. 359

Cons. 4 Prot. 7

NAME OF RISK: R.T.I. Leyland Inc. and Russell Brothers Limited

LOCATION: 2202 Third Avenue East & Rear, Owen Sound, Ontario

SURVEYED BY: Mona Ibrahim DATE: February 20, 1991

GENERAL COMMENTS

1. (a) OCCUPANCY: Heavy metal manufacturing of mobile cranes.

CONSTRUCTION

2. (a) FIRE DIVISIONS: See "Multiple Fire Section Sheets".

HAZARDS

3. (a) COMMON HAZARDS:

Heating:

Building 1 - Heat is provided by natural gas-fired unit heaters.

Building 2 - Heat is provided by a natural gas-fired boiler in the cut-off boiler room.

Building 3 - Heat is provided by a natural gas-fired low pressure boiler.

Building 4 - Heat is provided by natural gas-fired radiant heaters.

Fuel Supply: Underground natural gas connection.

Chimneys and Flues: Standard

3. (a) Cont'd

Air Type - Window  
Conditioning: 5% air conditioned.

Electrical: Safe. Circuit breakers and fuses used.  
Wiring has been updated in the last 30 years.  
Transformers PCB filled: No.

(b) SPECIAL HAZARDS: Mainly safe. See "Process Description".

(c) RADIOACTIVE MATERIALS: None

(d) HIGH PILING: None

(e) HOUSEKEEPING: Safe.

(f) HAZARDOUS MATERIALS: Safe. See "Process Description".

(g) EXPOSURES: There is no immediate exposures to the set of four buildings.

(h) ACTIVITY: Moderate, 8 Hrs/Day; 5 Days/Wk.

No. of Production Workers: Fifty

(i) SMOKING RESTRICTED: Yes

(j) ELECTRONIC Data Processing Equipment: There are several PC's in the office area.

(k) PROCESS DESCRIPTION:

Building No. 1 - Assembly of the crane booms with some storage of parts. Assembly is mostly manual with some welding and touch-up painting using spray cans.

Building No. 2 - Also assembly of mobile cranes using tools and a small machine shop, safely set-up.

Building No. 3 - Machine shop for the fabrication of various industrial products. Usual machinery to a metal worker such as lathes, drills, shears and brakes.

(k) PROCESS DESCRIPTION: Cont'd

Building No. 4 - This is where most of the heavy metal working takes place, with heavy brakes, shears, etc. In this building also is the sprinklered spray booth, measuring approximately 20' x 40'. During the survey, the following flammable liquids were stored in three ULC labelled flammable liquids storage cabinets: thirteen 5 gallon contains of paint, ten 5 gallon containers of thinner, eleven 5 gallon containers of lacquer paint.

PROTECTION

4. (a) SPRINKLER PROTECTION:  
OVERALL GRADING OF SPRINKLERS AND WATER SUPPLIES: See "Multiple Fire Section Sheets".

- (i) Area Sprinklered (excluding concealed spaces): 100%
- (ii) Date of Sprinklers: 100%: 1951. However, a sample of sprinkler heads was tested by ULC in 1976 and appeared to be adequate.
- (iii) Protection Against Freezing: Adequate
- (iv) Additional Sprinklers Required: No
- (v) Sprinkler Equipment Standard: Due to the age of the sprinkler heads and the existence of 3/4" piping on the premises, the system is slightly substandard.
- (vi) Alarms: Local alarms consisting of an outside water gong and inside electric bells and annunciator panel. The alarms are also connected to the Owen Sound Fire Department.
- (vii) Water Supplies:  
Primary: Municipal - Standard  
Secondary: No, not required.

Standard single water supply from a 6" connection to an 8" main fed both ways along Third Avenue East. Static pressure 100 p.s.i., residual pressure 95 p.s.i. with the 2" drain flowing fully open.

(vii) Water Supplies: Cont'd

This is an Ordinary Hazard Group 2 type occupancy requiring approximately 1000 U.S. g.p.m. at 40 p.s.i. A flow test conducted by the IAO in 1982 on Third Avenue indicates that with a static pressure of 88 p.s.i., 465 U.S. g.p.m. was available at 76 p.s.i. It is expected that the municipal water supply can meet the required demands.

(b) OTHER PROTECTION:

(i) Extinguishers: Standard

(ii) Standpipe and Hose: The existing standpipe and hose system is provided with straight stream nozzles.

(c) OUTSIDE PROTECTION:

(i) Hydrants: Public: Non-Standard, due to their distance from all corners of the building.

Private: Non-Standard.

Note: The combination of public and private hydrants provide adequate protection.

(ii) Fire Dept. Public: Paid

Distance to Fire Hall: 1 mile

F.U.S. Classification of Municipality: 5

(iii) Accessibility:

To Property - Good

Into Building - Good

5.

EXTENDED COVERAGE

WINDSTORM - Unusual Hazards: None

LIGHTNING - Unusual Hazards: None

EXPLOSION - Unusual Features: There is one large boiler located in a cut-off boiler room.

SPRINKLER LEAKAGE:

Stock Skidded or Shelved: In part

Stock Susceptible to Large Water Damage: No

Floors Drained: No

RIOT, VANDALISM, MALICIOUS ACTS:

Access Restricted: Yes

Yards Fenced: Yes

Yards Lit: Yes

Remote From Populated Areas: Yes

EARTHQUAKE - Zone: 0

IMPACT HAZARDS:

By Aircraft: No

By Road Vehicles: No

By Trains: Yes. The CPR railway track is approximately 25' east of the property line of the Insured. There are also some railroad track that goes through the Insured's property, however they are no longer functional.

By Floating Vessels: No

6.

BUSINESS INTERRUPTION

Seasonal: No

Operation: 8 Hrs/Day 5 Days/Wk.

Interdependency: No

Raw Materials Mainly: Mainly Domestic

Stock on hand for: Variable

Stock Replacement Time: Readily available

Computerized Programming: In part

Single Train Production: No

Vital Machinery Custom Made: There are several heavy duty shears and brakes used in Building No. 4. These are custom made.

Replacement Time: Could take up to a year to replace these machines.

Private Power Generation: No

Alternative Power Source: No

Production Dependent on Pollution Control Equipment: No

Other Important Features: None

7.

UNDESIRABLE FEATURES

PROMINENT: None.

OTHER: See "Recommendation Letter".

8.

MANAGEMENT - LOSS PREVENTION PROGRAMMES

Satisfactory for class of risk.

9. TENANTS: None.

MULTIPLE FIRE SECTION SHEET:

BLDG. NO. 1

100% A.S.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

## Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

### **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Sep 2020**

### **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Oct 2018**

### **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Sep 30, 2021**

### **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2019**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Sep 30, 2021**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Nov 2021**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Jul 2021**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994 - Dec 31, 2021**

**Drill Hole Database:**

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Sep 2020**

**Delisted Fuel Tanks:**

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: May 31, 2021**

**Environmental Activity and Sector Registry:**

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011- Nov 30, 2021**

**Environmental Registry:**

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994 - Dec 31, 2021**

**Environmental Compliance Approval:**

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011- Nov 30, 2021**

**Environmental Effects Monitoring:**

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Nov 30, 2021**

**Environmental Issues Inventory System:**

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2020**

**List of Expired Fuels Safety Facilities:**

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2020**

**Federal Convictions:**

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Nov 2021**

**Fisheries & Oceans Fuel Tanks:**

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019**

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: May 31, 2018**

**Fuel Storage Tank:**

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Fuel Storage Tank - Historic:**

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Nov 30, 2021**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Dec 2019**

**TSSA Historic Incidents:**

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Landfill Inventory Management Ontario:**

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Feb 28, 2019**

**Canadian Mine Locations:**

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Dec 2020**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2019**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Jun 30, 2021**

**National Energy Board Wells:**

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Nov 30, 2021**

**Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Jan 2021**

**Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994 - Dec 31, 2021**

**Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**

**Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

<b><u>Pesticide Register:</u></b>	Provincial	<b>PES</b>
The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.		
<b>Government Publication Date: Oct 2011- Nov 30, 2021</b>		
<b><u>Pipeline Incidents:</u></b>	Provincial	<b>PINC</b>
List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.		
<b>Government Publication Date: May 31, 2021</b>		
<b><u>Private and Retail Fuel Storage Tanks:</u></b>	Provincial	<b>PRT</b>
The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).		
<b>Government Publication Date: 1989-1996*</b>		
<b><u>Permit to Take Water:</u></b>	Provincial	<b>PTTW</b>
This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.		
<b>Government Publication Date: 1994 - Dec 31, 2021</b>		
<b><u>Ontario Regulation 347 Waste Receivers Summary:</u></b>	Provincial	<b>REC</b>
Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.		
<b>Government Publication Date: 1986-1990, 1992-2019</b>		
<b><u>Record of Site Condition:</u></b>	Provincial	<b>RSC</b>
The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.		
RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).		
<b>Government Publication Date: 1997-Sept 2001, Oct 2004-Dec 2021</b>		
<b><u>Retail Fuel Storage Tanks:</u></b>	Private	<b>RST</b>
This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.		
<b>Government Publication Date: 1999-Sep 30, 2021</b>		
<b><u>Scott's Manufacturing Directory:</u></b>	Private	<b>SCT</b>
Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.		
<b>Government Publication Date: 1992-Mar 2011*</b>		
<b><u>Ontario Spills:</u></b>	Provincial	<b>SPL</b>
List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.		
<b>Government Publication Date: 1988-Sep 2020</b>		

**Wastewater Discharger Registration Database:**

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-Dec 31, 2018**

**Anderson's Storage Tanks:**

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Dec 2020**

**Variations for Abandonment of Underground Storage Tanks:**

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011- Nov 30, 2021**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Apr 30, 2021**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

## Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

### **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Sep 2018**

### **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Oct 2018**

### **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Jul 31, 2019**

### **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2017**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

List of commercial underground fuel oil tanks made available by the Fuels Safety Program of the Technical Standards & Safety Authority (TSSA). Ontario Regulation 213/01 of the Technical Standards and Safety Act (2000) requires that all underground tanks be registered with the TSSA. Note: the Fuels Safety Division does not register waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of commercial fuel tanks in the province. The TSSA updates information in its system on an ongoing basis; this listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: Feb 28, 2017**

**Chemical Register:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jul 31, 2019**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 - Mar 2019**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Jul 2019**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994-Aug 31, 2019**

**Drill Hole Database:**

Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Oct 2018**

**Environmental Activity and Sector Registry:**

Provincial **EASR**

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011-Aug 31, 2019**

**Environmental Registry:**

Provincial **EBR**

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994-Aug 31, 2019**

**Environmental Compliance Approval:**

Provincial **ECA**

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011-Aug 31, 2019**

**Environmental Effects Monitoring:**

Federal **EEM**

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private **EHS**

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Jul 31, 2019**

**Environmental Issues Inventory System:**

Federal **EIIS**

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2018**

**List of TSSA Expired Facilities:**

Provincial EXP

List of facilities and tanks - for which there was once a registration - no longer registered with the Fuels Safety Program of the Technical Standards and Safety Authority (TSSA). Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc. Tanks which have been removed from the ground are included in the expired facilities inventory held by the TSSA. Notes: the Fuels Safety Division did not register private fuel underground/aboveground storage tanks prior to January of 1990, or furnace oil tanks prior to May 1, 2002; nor does the Division register waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

**Government Publication Date: Feb 28, 2017**

**Federal Convictions:**

Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

**Government Publication Date: Jun 2000-May 2019**

**Fisheries & Oceans Fuel Tanks:**

Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2018**

**Fuel Storage Tank:**

Provincial FST

List of registered private and retail fuel storage tanks made available by the Fuels Safety Program of the Technical Standards & Safety Authority (TSSA). Ontario Regulation 213/01 of the Technical Standards and Safety Act (2000) requires that all underground tanks be registered with the TSSA. Notes: the Fuels Safety Division did not register private fuel underground/aboveground storage tanks prior to January of 1990, or furnace oil tanks prior to May 1, 2002; nor does the Division register waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of fuel storage tanks/tank facilities in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

**Government Publication Date: Feb 28, 2017**

**Fuel Storage Tank - Historic:**

Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Jul 31, 2019**

**Greenhouse Gas Emissions from Large Facilities:**

Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Dec 2017**

**TSSA Historic Incidents:**

Provincial **HINC**

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal **IAFT**

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**TSSA Incidents:**

Provincial **INC**

List of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC) and made available by the Technical Standards and Safety Authority (TSSA). Under the Technical Standards & Safety Act (2000), the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors, and equipment or appliances that use fuels. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

**Government Publication Date: Feb 28, 2017**

**Landfill Inventory Management Ontario:**

Provincial **LIMO**

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Feb 28, 2019**

**Canadian Mine Locations:**

Private **MINE**

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial **MNR**

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Jan 2019**

**National Analysis of Trends in Emergencies System (NATES):**

Federal **NATE**

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial **NCPL**

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2017**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Jun 30, 2019**

**National Energy Board Wells:**

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

[NPCB](#)

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

[NPRI](#)

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-May 31, 2019**

**Ontario Oil and Gas Wells:**

Provincial **OOGW**

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Jun 2019**

**Inventory of PCB Storage Sites:**

Provincial **OPCB**

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial **ORD**

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994-Aug 31, 2019**

**Canadian Pulp and Paper:**

Private **PAP**

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**

**Parks Canada Fuel Storage Tanks:**

Federal **PCFT**

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial **PES**

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: 1988-Mar 2019**

**TSSA Pipeline Incidents:**

Provincial **PINC**

List of pipeline incidents (strikes, leaks, spills) made available by the Technical Standards and Safety Authority (TSSA). Under the Technical Standards & Safety Act (2000), the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors, and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of pipeline incidents in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

**Government Publication Date: Feb 28, 2017**

**Private and Retail Fuel Storage Tanks:**

Provincial **PRT**

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial **PTTW**

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994-Aug 31, 2019**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial **REC**

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-2016**

**Record of Site Condition:**

Provincial **RSC**

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Jul 2019**

**Retail Fuel Storage Tanks:**

Private **RST**

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-Jul 31, 2019**

**Scott's Manufacturing Directory:**

Private **SCT**

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial **SPL**

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date: 1988-Feb 2019**

**Wastewater Discharger Registration Database:**

Provincial **SRDS**

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-Dec 31, 2017**

**Anderson's Storage Tanks:**

Private **TANK**

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal **TCFT**

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970-Aug 2018**

**TSSA Variances for Abandonment of Underground Storage Tanks:**

Provincial **VAR**

List of variances granted for abandoned tanks. Under the Technical Standards and Safety Authority (TSSA) Liquid Fuels Handling Code and Fuel Oil Code, all underground storage tanks must be removed within two years of disuse. If removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of tank variances in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

**Government Publication Date: Feb 28, 2017**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011-Aug 31, 2019**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Feb 28, 2019**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Dear Sarah DiBattista  
RE: Request #: EPI-2022-2000000057

This letter confirms that, after conducting a thorough search of its source system applications, the ministry has identified potential records related to your property request. Our search indicates that the ministry may hold the following records:

- Correspondence, Abatement, Occurrence reports
- Air Approvals
- Waste Approvals
- Brownfields

If you would like to proceed to submit a Freedom of Information request to the ministry, please visit [FOI eForm](#).

If you have any questions regarding the matter, please contact the ministry at [eproperty@ontario.ca](mailto:eproperty@ontario.ca).

Sincerely,

Environmental Property Information Team

**Disclaimer**

This search result is provided for informational purposes only and is not intended to provide specific advice or recommendations. The Ministry of the Environment, Conservation and Parks (MECP) cannot and does not guarantee that the information provided is current, accurate, complete, or free of errors. Any reliance upon this information is solely at the risk of the user.

Madame,  
Monsieur, Sarah DiBattista  
Objet : No de demande : EPI-2022-2000000057

La présente lettre confirme que, après avoir effectué une recherche exhaustive dans ses applications de système source, le ministère a circonscrit des dossiers potentiels reliés à votre demande concernant des biens immobiliers. Notre recherche indique que les dossiers suivants peuvent être en possession du ministère :

- Correspondence, Abatement, Occurrence reports
- Air Approvals
- Waste Approvals
- Brownfields

Si vous souhaitez présenter une demande d'accès à l'information au ministère, nous vous invitons à visiter le [Formulaire électronique FOI](#).

Si vous avez des questions concernant votre demande, nous vous invitons à communiquer avec le ministère à l'adresse électronique suivante : [eproperty@ontario.ca](mailto:eproperty@ontario.ca).

Veuillez recevoir mes salutations les plus sincères,

L'équipe des données environnementales relatives aux biens immobiliers

Dear Sarah Dibattista:

RE: ***Freedom of Information and Protection of Privacy Act Request  
Our File # A-2022-00591***

Please be advised this **revised** letter is to inform you that **the search will be conducted on the following: 2198 3rd Avenue East (previous known as 2202 3rd Avenue East), Owen Sound. If there is any discrepancy please contact us immediately.**

You may expect a reply or additional communication as your request is processed. For your information, the Ministry charges for search and preparation time.

Due to the COVID-19 outbreak, requesters may experience some delays with FOI requests at this time.

If you have any questions regarding this matter, please contact Sharon Menzies at (416) 276-6548 or [Sharon.Menzies@ontario.ca](mailto:Sharon.Menzies@ontario.ca).

Yours truly,

Dear Sarah Dibattista:

RE: ***Freedom of Information and Protection of Privacy Act Request***  
**Our File # A-2022-00591, Your Reference EPI-2022-2000000057**

The Ministry is in receipt of your request made pursuant to the *Freedom of Information and Protection of Privacy Act* and has received your payment in the amount of \$5.00 (non-refundable application fee).

**The search will be conducted on the following: 2198 3rd Avenue East, Owen Sound. If there is any discrepancy please contact us immediately.**

You may expect a reply or additional communication as your request is processed. For your information, the Ministry charges for search and preparation time.

Due to the COVID-19 outbreak, requesters may experience some delays with FOI requests at this time.

This is to advise you, we've gone digital! Requests submitted by fax will no longer be accepted starting August 31, 2021. If you submitted requests by fax before August 31, 2021, we'll process it. Please don't re-submit it using the online form or you might get charged twice. The online form can be found on the central forms repository at the following link

<https://www.forms.ssb.gov.on.ca/mbs/ssb/forms/ssbforms.nsf/FormDetail?OpenForm&ACT=RDR&TAB=PROFILE&SRCH=1&ENV=WWE&TIT=freedom+of+information&NO=012-2146E>.

If you have any questions regarding this matter, please contact Sharon Menzies at (416) 276-6548 or Sharon.Menzies@ontario.ca.

Yours truly,

Noel Kent  
Manager, Access and Privacy

**CAUTION:** This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

**Please refrain from sending documents to head office and only submit your requests electronically via email along with credit card payment. We are all working remotely and mailing in applications with cheques will lengthen the overall processing time.**

### **NO RECORD FOUND**

Hello,

Thank you for your request for confirmation of public information.

- We confirm that there are no records in our database of any fuel storage tanks at the subject addresses.

For a further search in our archives please complete our release of public information form found at [https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?\\_mid\\_=392](https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?_mid_=392) and email the completed form to [publicinformationsservices@tssa.org](mailto:publicinformationsservices@tssa.org) along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard).

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

Mariah
